PROFESSIONAL EXPERIENCE

- **Part-time Lecturer / Practical Work Instructor** (*February 2026 – jun 2026*)

University of Algiers 1 Benyoucef Benkheda, Algeria

- Supervision and facilitation of Animal Biology practical sessions (Histology option), including technical preparation of histological sections, in-depth microscopic tissue study, and comparative structural analysis of various tissue types.
- Guiding students in acquiring skills in morphological observation, histological interpretation, and scientific reasoning.
- **Practicing Biologist – Scientific Pharmacy Advisor** (*November 2020 – Present*)

BOUHMADOUCHE Pharmacy, Hussein Dey, Algiers

- Evolved from intern to pharmacy assistant, demonstrating adaptability, professional rigor, and versatility.
- Daily mobilization of knowledge in pharmacology, biochemistry, and microbiology within an applied health context.
- Providing scientific advice to patients regarding medications, biological tests, and common pathologies.
- Analysis and interpretation of medical prescriptions in conjunction with patient biological data.
- Monitoring scientific and regulatory developments in the pharmaceutical and biomedical fields.
- Acting as an interface between healthcare professionals and patients through scientific mediation.
- Mastery of professional software and inventory organization.
- **Pharmacy Intern** (*November – December 2020*)

BOUHMADOUCHE Pharmacy, Hussein Dey, Algiers

- Learned dispensary operations and application of good pharmaceutical practices.
- Introduction to professional pharmaceutical management software tools.
- Participation in drug inventory management and tracking.
- Practical application of knowledge acquired in pharmacological sciences within a real clinical environment.

- Counseling and orienting patients regarding common pathologies.
- **Biochemistry Laboratory Intern** (*September – October 2022*)

Pierre and Marie Curie Center, Algiers

- Performed blood biological analyses and interpreted clinical results, applying oncology knowledge to patient biological monitoring.
- Mastered automated medical analyzers (Helena V8 class E, Cobas E411, ADVIA 1800).
- **Master's Graduation Project:** *Utility of Nanovectorized Curcumin in a Mg-Al Layered Double Hydroxide on a Murine Model of Inflammatory Bowel Disease* (*March – June 2022*)

University of Science and Technology Houari Boumediene (USTHB)

- As part of an inter-laboratory collaboration (Cellular Pharmacology & Natural Gases, USTHB), developed a nanoparticulate system based on curcumin encapsulated in a MgAl Layered Double Hydroxide (MgAl-HDL-Cur) for treating chronic inflammatory bowel diseases.
- Work encompassed co-precipitation synthesis, physicochemical characterization (XRD, FTIR), and biological validation using a murine model.
- Results demonstrated a significant reduction in oxidative stress and restoration of the redox balance, with efficacy comparable to 5-FU.
- Project defended with High Honors ("*Très Bien*").
- **Central Biochemistry Laboratory Intern** (*July – August 2019*)

Mustapha Pacha University Hospital Center

- Preparation and processing of liquid biological samples applying biochemical analysis techniques.
- Performance of biochemical and enzymatic assays in accordance with supplementary medical prescriptions.

EDUCATION & ACADEMIC BACKGROUND

- **Master 2 in Pharmacological Sciences** (*2020 – 2022*)

University of Science and Technology Houari Boumediene (USTHB)

- Advanced training in cellular and molecular pharmacology, with a specialization in pharmaco-oncology and nanopharmacology.
- Covered key areas including drug design, molecular toxicology, pharmacogenomics, oxidative stress, and pharmacovigilance.
- Mastery of experimental pharmacology techniques, analytical methods, and statistical analyses.
- **Bachelor's Degree in Fundamental and Applied Biochemistry** (*2017 – 2020*)

University of Science and Technology Houari Boumediene (USTHB)

- Fundamental training in cellular and molecular biochemistry, combining solid theoretical foundations with technical skills.
- Covered essential areas of structural and functional biochemistry, molecular biology, immunology, enzymology, and genetic engineering, complemented by mastery of biochemical analysis techniques.

CERTIFICATES

- **R programming & Data analysis training** (*July 2026*) — Mira Academy
- **ISO 9001 Version 2015 Quality Management System** (*April 2019*) — IFAQT
- **Application of Good Laboratory Practices in Quality Control Laboratories** (*April 2019*) — WANYLAB Laboratory

LANGUAGES & SOFT SKILLS

- **Languages:**
 - Arabic: Native
 - French: C1 Level
 - English: B1 Level
- **Core Competencies:**
 - Scientific rigor and methodological precision.
 - Analytical mind and developed critical thinking.
 - Autonomous yet collaborative, adaptable, fast learner, and highly organized in priority management.
 - Ability to convey complex scientific concepts with clarity and pedagogy.
- **Extracurricular Activities:**
 - Member of the BioScience Club
