EXPERIENCE

Adjunct Lecturer — Practical Work Supervisor

University of Algiers 1 Benyoucef Benkheda, Algeria · February 2025 – Present

Supervision and facilitation of practical work in Animal Biology (Histology option), including technical preparation of histological sections, in-depth microscopic study of tissues, and comparative structural analysis of different tissue types. Support students in developing skills in morphological observation, histological interpretation, and scientific reasoning.

Practicing Biologist — Scientific Pharmacy Advisor

Pharmacie BOUHMADOUCHE, Hussein Dey, Algiers · November 2020 – Present

Progressed from trainee to pharmacy advisor within this pharmacy, reflecting strong adaptability, professional rigor, and versatility.

Practicing Biologist – Pharmacy Advisor, January 2021 – Present

- Daily application of pharmacology, biochemistry, and microbiology knowledge in an applied healthcare setting
- Scientific guidance for patients on medications, biological tests, and common conditions
- Analysis and interpretation of medical prescriptions in relation to patients' biological data
- Monitoring of scientific and regulatory developments in the pharmaceutical and biomedical fields
- Acting as an interface between healthcare professionals and patients through scientific mediation
- Proficiency with professional pharmacy-management software and inventory organization

Pharmacy Trainee, November – December 2020

- Learned pharmacy operations and applied good pharmaceutical practices
- Introduction to professional pharmacy-management software
- Participated in medication stock management and monitoring
- Applied pharmacological science knowledge in a real clinical environment
- Patient counseling and guidance on common conditions

Laboratory Intern — Biochemistry

Centre Pierre et Marie-Curie, Algiers · September – October 2022

Performed blood biological analyses and interpreted clinical results, applying oncology knowledge to patient biological monitoring; operated medical laboratory analyzers including Helena V8 Class E, Cobas E411, and ADVIA 1800.

Graduation Project — Curcumin-based Nano-therapy for the Treatment of Inflammatory Bowel Disease

University of Science and Technology Houari Boumediene (USTHB) · March – June 2022

As part of an inter-laboratory collaboration (Cellular Pharmacology & Natural Gases, USTHB), developed a nanoparticulate system based on curcumin encapsulated in a MgAl Layered Double Hydroxide (MgAl-HDL-Cur) for the treatment of chronic inflammatory bowel disease. The work included synthesis by co-precipitation, physicochemical characterization (XRD, FTIR), and biological validation in a murine model. Results demonstrated a significant reduction in oxidative stress and restoration of redox balance, with efficacy comparable to 5-FU. Project defended with High Distinction ("Très Bien").

Laboratory Intern — Central Biochemistry Laboratory

Mustapha-Pacha University Hospital Center, Algiers · July – August 2019

Prepared and processed liquid biological samples, applying biochemical analysis techniques; performed biochemical and enzymatic assays in accordance with medical prescriptions.

EDUCATION

Master's Degree (M2) in Pharmacological Sciences

University of Science and Technology Houari Boumediene (USTHB) · 2020 – 2022

Advanced training in cellular and molecular pharmacology, with a specialization in pharmaco-oncology and nanopharmacology. Curriculum covered drug design, molecular toxicology, pharmacogenomics, oxidative stress, and pharmacovigilance. Proficient in experimental pharmacology techniques, analytical methods, and statistical analysis.

Bachelor's Degree in Fundamental and Applied Biochemistry

University of Science and Technology Houari Boumediene (USTHB) · 2017 – 2020

Foundational training in cellular and molecular biochemistry, combining theoretical knowledge with technical skills. Curriculum covered structural and functional biochemistry, molecular biology, immunology, enzymology, and genetic engineering, complemented by proficiency in biochemical analysis techniques.

CERTIFICATIONS

- ISO 9001:2015 Quality Management System — IFAQT, April 2019
- Application of Good Laboratory Practices in a Quality Control Laboratory — WANYLAB Laboratory, April 2019

QUALITIES

- Scientific rigor and methodological precision
- Developed analytical and critical thinking skills
- Autonomous while also a strong team collaborator, with adaptability, quick learning, and effective priority management
- Able to convey complex scientific concepts with clarity and pedagogy

LANGUAGES

Arabic: Native | French: C1 | English: B1

EXTRACURRICULAR ACTIVITIES

Member of the BioScience Club.
